

M-CAM, Inc. is a global intellectual property and intangible financial risk actuarial company dedicated to developing, enabling and promoting uniform accountability and quality standards for the granting, use, leverage, and

disposal of such rights in the global economy. From our pioneering work in creating the world's first standards-based innovation collateralization financial products for banking and securities to our work on international grass-roots innovator enablement, M-CAM endeavors to balance the interests of the public and industrial development supporting creativity to build thriving economies. M-CAM has been actively involved with a number of activities in South Africa focusing on enabling entrepreneurial ventures in areas where ethnic barriers once prohibited innovators to reach regional or international markets. We were a proud partner of the first integrated life sciences firm in South Africa, a company based in Cape Town. The beauty of the land and its people, reflected tonight in the luminescence of tonight's music, has served as an inspiration for us. Let the Soweto Gospel Choir's enthusiasm inspire you!
